

# Bake in Glass!

## ★ **PYREX** Glass Dishes for Baking (*"FIRE - GLASS"*)

Trade Mark Registered

*The newest method—swift, clean, economical*

The alert and capable housewife will greet the picture of the dishes shown above with a genuine little "thrill" of surprise and pleasure.

Away with the drudgery of scouring and scrubbing, the fruitless and endless efforts to clean things which seem to resist all cleaning! Away with slow, tedious baking! Away with unsightliness in the kitchen and sore trials to the temper!

Pyrex is a new-process glass that withstands the heat of the hottest oven. It is transparent, strong, will not chip or craze, will stand up under constant long use—thoroughly practical, effective and economical for baking utensils.

With Pyrex you bake faster and better; these glass dishes cook at a higher temperature than earthenware or metal.

You bake and serve in the same dish. You use fewer dishes. You clean Pyrex dishes with the utmost ease—polish them to a brilliant sheen. You save work, time, fuel (money) pantry space.

Every woman with the interests of her home at heart should give Pyrex a trial. Booklet on request showing the wide range of dishes that may be baked and served in Pyrex.
