George Willdey Bijoutier & vendure d'Estampes demene au coin de la rue de Ludgate (en Anglois) Ludgate-street prez de l'Eglise de St. Paul;

Doit tous Articles (ou qui pretendent l'être) de faire, ou produire des Lunettes, ou verres à lire, Telescopes de toutes sortes, de lunettes d'appareille, & autres curiositez, de cette nature, meilleures, que les heines, ou d'en montrer plus de choix, & vendre à plus juste prix.

Il vend encore (à aussi bon marche, que les ouvriers) toute sorte de Quinquilleries, & Bricols curieux (d'Or, d'Argent, de metal du Baril, d'Or, d'Argent, d'Autre metal, de nacre de Perle, d'Agate, d'Amber, d'écaille de tortue, & de boetes rares, comme tabatières, couteillers, couteils à quilliers, & fourchettes, jolis fourruments, perles fines, ver talis, coilliers de France, & autres, pendans d'oreilles, bagues, & pierres fines & fines, crochets, chaînes, & corions à Montres, boucles, boutons & autres curiositez de cette nature.

I vend aussi toutes sortes d'Estampes d'Angleterre, de France, d'Hollande, & d'Italie au plus juste prix, & de belles, & bien correctes, Cartes de Geographie, grandes de deux feuilles à 9 sols piece, aussi bonnes, ou meilleurs, que celles, qui se vendent ailleurs à douze, ou dix huit sols; & toutes sortes de bon tabac en poudre.

Celestial Heat, Fire and Flame, or the Sun's Heat so furiously united as to exceed all other Fires upon Earth, demonstrated to the Curious by a large BURNING GLASS in these following and many other curious and usefull Experiments; it is ten Foot square and so artfully made as to unite all the Parts of the Sun that falls on the Glass in a Circular Space of Two Inches at near Nine Foot distance from the Glass where the Heat is so furious, that Gold, Silver, Copper, Brass, Iron and other Metals are there melted in an Instant; yet the Fury of this Celestial Fire is much better express by its viterifying immediately Slate, Pumice, Crucible Tyles, Bricks, Sand, Stones, and those Materials that have withstood the fiercest Fires of the most artful and hottest Furnaces in the World for many Years; yet if you hold your Hand but an Inch from the Focus, the Heat is not perceived, but in it, it is 50 times hotter than any Furnace upon Earth. It hath many Degrees of Heat, in one it will serve for a Hot Bath, in another for a Sun Kitchen, where M. at may be roasted, boiled, baked, stew'd or broiled; Coffee, Tea, and Chocolate made; in another Iron and other Metals forged or melted into all manner of Shapes, and whatever is done by any other Fire may be done by, and infinitely exceeded by this Celestial Heat. N. B. This burns 20 Times as much more as that show'd in Spring Garden, though he took 5 s. and half a Crown of each Person for the sight of that, mine shall be shew'd gratis to all my Customers that lay out Five Shillings or more with me, if the Sun shines and the Air be clear. I have several small Sizes of these sort of Burning Glasses: Besides the Burning Quality these Glasses are more useful and diverting than any other sort of Looking Glasses, and will answer the same End in many Particulars, and much exceed them in many others. If you stand at one distance your Face will be magnified several Foot bigger than it really is, and your Body from Eight to 33 Foot high, and in due Proportion, at one distance your Head will be upright a little further upside down, as if you stood with your Head downwards: Stretch forth your Hand and another will come

out of the Glass and shake Hands with you, and another will seem to come out of the Glass at a good distance and Salute you, sometimes with two Chins, two Noses and three Eyes; at other Times with one Eye in the middle of your Forehead. These and many more diverting Fancies may be done by these excellent Concave, Looking and Burning Glasses.

A Large, new and correct English Map of the World, laid down according to the newest and most accurate Observations and Discoveries made by the Royal Society of London, and the Royal Academy of Sciences at Paris in several different Projections, including the Trade Winds, Monsoons, Variation of the Compass, and illustrated with the Ptolomic, and Copernic and Tyconic Systems, and the Appearances of the Planets, and the Hour of the Day in every Kingdom and Place upon the Earth, with many useful and ornamental Explanations. This Map is 3 Foot 4 Inches deep, and 6 Foot 4 Inches long, and round the same is added, instead of useles Ornaments, a Set of 20 different new Sheet Maps of the principal Kingdoms and States of Europe; with pertinent Historical Explanations to each Map, so as to make it, when put together with its proper Colours and Illuminations, one of the largest, beautifullest, most useful and diverting Ornaments, as well as best Set of Geography ever yet done of this kind. The Names of the Maps aforesaid are a Northern Celestial Hemisphere, a Southern ditto, England, Scotland, Ireland, 20 Miles round London, 20 Miles round Oxford, 20 Miles round Cambridge, Germany, France, Spain, Italy, Sweedland, Poland, Denmark, Muscovy, Hungary, the Turks Dominions in Europe, Flanders and the Seven united Provinces. This Set of Maps may be fitted up several ways and sizes, or bound in a Book, or sold single to fit Gentlemens Conveniences. It is done at the Charge, and sold by me as above.
